

CBC Vinematim purchased EditShare storage solution for Vietnam Film Institute

Danmon Asia completed the successful delivery of **Editshare storage solution** to the Vietnam Film Institute or VFI in March 2015 for the project on the national storage area of materials of motion pictures. The delivery was performed via our partner – Cinema Broadcast JSC or CBC Vinematim.

Data source of movie, document film, ... in celluloid film format, that is passed through the scanner system to convert this format to many different standards, then these files are saved directly to the Editshare storage system. In storage system, the data is classified, managed in multiple folders for convenient of data access from the user.

Danmon Asia's Pre-sales Engineer – Mr. Pham Hoang Thanh Son said: "Users connect to the Editshare storage system via fiber cable of 10Gb or 1Gb with a 10Gb switch. At the workstations, users can directly edit files that stored on Editshare storage servers, sharing files with other users, as well as to ingest new data to the server from other external sources."

The management of storage space (media space), create new users, assign user authorization, assign of permission to read/write data ... are done easily at Editshare storage server as well as workstations.

There is a special thing at the Vietnam Film Institute that they used many high capacity workstations, and for adequately Editshare server also provide many high speed

connections (connection of 10Gb) via fiber cable and optic module to meet demand high speed processing, editing. Connections between the server storage and network switch via two of 10Gb core CX6 cables. Connections between the scanner, two main workstation and Switch via 10Gb fiber cable, other workstations connected to switch via 1Gb Ethernet cable.

With simple configuration and management of the Editshare server, the Film Institute's technical team has controlled all storage system in just a day both configuration and training.

Vietnam Film Institute is organization where do preservation and storage of valuable footage of Vietnam with abundance of data source and data format that created along to the formation and development of Vietnam's revolutionary history. Therefore, demand for storage and handling of the complex data sources require adequate systems. Vietnam Film Institute chose Editshare solutions to meet their requirement.
