

EVOLUTION WIRELESS DIGITAL Evolving with you

Introducing an affordable Wireless Digital microphone system, that can be delivered in same configurations as the world famous Sennheiser EW 100 – G4

Evolution Wireless Digital provides the most reliable connection for any situation, any place, today or even tomorrow - whether it's **voice, lecture, conference, moderation** or **live performance**. Easy installation and monitoring via app on your device.

Easy Setup & Monitoring

The **Evolution Wireless [Digital Smart Assist App](#)** provides mobile access to all system settings. The benefit of remote monitoring in the palm of your hand saves you time and energy. The app provides automated setup, operation and monitoring to guarantee reliable connection. **Equidistant tuning grid** equally spaces frequencies alongside each other, replacing the need for RF coordination. Benefit also from the elimination of intermodulation dropouts and the ability to maximize your channel count, even in congested RF environments. **Color Coded channels** allow you to identify the system components easily.

Versatile usage & Reliable operation

With its **broad range of accessories** and the flexibility to choose all **Sennheiser or Neumann microphone handheld heads**, Evolution Wireless Digital can be used in any situation you might face. It **provides more dynamic range than any wireless system currently on the market**, automatically secures the **most reliable signal** in a snap and allows for **up to 12 hours of operation with a rechargeable battery pack**.

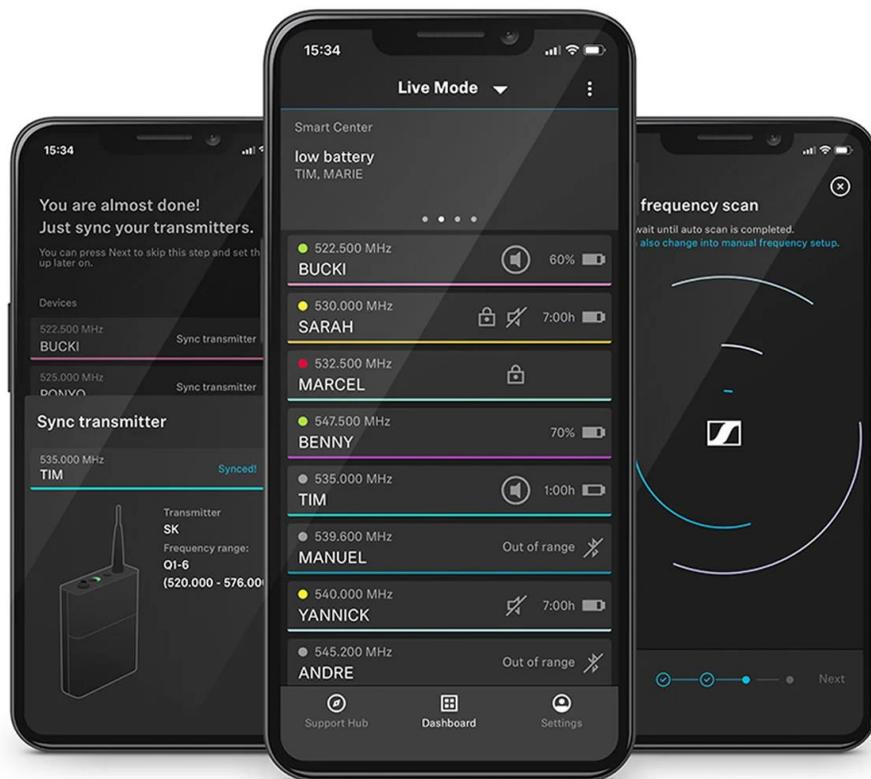

Future-Proof Investment

To equip you well for today and even future extensions, Sennheiser is providing the **highest dynamic range, Bluetooth Low Energy and a scalability for up to 90 channels**. You can rely on the wireless microphone system no matter how your needs and environment change over time. A **rugged metal housing** guarantees protection for a reliable device that can be used for a long time.

EW-D SMART ASSIST APP
EW-D Smart Assist App makes the setup and use of Evolution Wireless Digital **simple and fast**. Use your **Android or iOS device** to connect **via Bluetooth** for an efficient setup and overview of your new wireless system. The app provides **automated setup of receivers and transmitters, frequency allocation, channel naming, muting and battery status**. It offers instant access to all system settings as well as a support hub with video tutorials and detailed manuals to get you started. Stay current with **firmware updates** accessible directly within the app.
